

SUSHMITA DHANDAR

Full Stack Web Developer (MERN) | React.js & Node.js Developer
Pune, Maharashtra, India | +91 7796031552 | dhandarsushmita@gmail.com
github.com/Dhandar | linkedin.com/in/sush2000

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building and deploying production web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Comfortable working across the full development cycle: designing REST APIs, building responsive React front ends, managing data in MongoDB, and setting up secure JWT-based authentication. Completed a full-stack development internship at Devotra Infotech, delivering features in an Agile, remote team environment using Git, Docker, and CI/CD pipelines. Solid foundation in Data Structures & Algorithms and Object-Oriented Programming. Looking for a Full Stack Developer or Frontend Developer role to build reliable, user-friendly web applications.

CORE TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication, API Integration

Database: MongoDB, Mongoose ODM, MySQL, SQL

Tools & Practices: Git, GitHub, Postman, Docker, CI/CD, Agile/Scrum, Code Review, VS Code

Programming Languages: JavaScript, Python, Java

INTERNSHIP EXPERIENCE

MERN Stack Web Developer Intern — Devotra Infotech

March 2026 – Aug 2026

- Built and deployed full-stack web applications using MongoDB, Express.js, React.js, and Node.js as part of an Agile team, working through Git pull requests and peer code reviews.
- Worked closely with the team to understand requirements, write clean and reusable code, and fix bugs quickly during testing.

PROJECTS

Airbnb Clone — Property Listing & Booking Website

Personal Project | MongoDB, Express.js, React.js, Node.js, Redux, JWT, Mongoose, REST APIs

- Built a full booking website, similar to Airbnb, where users can list a property, search for stays, and book a place to stay, with 12+ backend APIs (Express.js/Node.js) for property listings backed by MongoDB.
- Set up secure login with JWT and role-based access control, so regular users and admins each see the right features for their role.
- Built the website's front end with React.js and Redux, and improved how the app manages data on screen, cutting unnecessary page re-renders by 30% for a smoother experience.

Personal Portfolio Website — Full Stack (MERN)

Personal Project | React.js, Node.js, Express.js, MongoDB, Vercel, Render

Live: portfolio-project-eight-woad.vercel.app

- Built and deployed a full-stack personal portfolio website with a responsive React.js frontend and a RESTful Express.js backend.
- Implemented a contact form with server-side validation, spam protection (honeypot and rate limiting), and automated email notifications via Nodemailer/SMTP.
- Designed a MongoDB (Atlas) schema with Mongoose to persist form submissions, with a token-protected API endpoint for reviewing messages.
- Deployed the frontend on Vercel and backend on Render with environment-based configuration, CORS handling, and CI-based auto-deployment from GitHub.

EDUCATION

Master of Computer Applications (MCA) — Dr. D.Y. Patil College, Pune

2024 – 2026

CGPA: 8.5 | First Class

B.Sc. Computer Science — Amravati University, Buldhana, Maharashtra

2018 – 2021

76% | First Class

CERTIFICATIONS

- MERN Stack Development
- Data Structures & Algorithms (DSA)
